J. L. Yeager/AHR

Bob Becker has asked me to coordinate preparation of a presentation and recommendation on our various options for handling spent potlining. I believe much of the necessary background information is readily available. In order to put this all together, I would like to have a one-day meeting beginning at 8:30 a.m. at Arlington Ridge on November 21, 1983, to address the following:

1. Update regulatory activity on spent potlining.
2. Review current disposal methods at each plant.
3. Determine implications of current disposal methods.
4. Identify possible alternatives for each plant.
5. Determine implications of each alternative.
6. Develop a recommendation and presentation outline.

Could each of you bring whatever information you have relating to these issues to the meeting.
